

Made For Your Business

The Cat® 2EPC5000-2EP6500 series of electric pneumatic tire lift trucks offers maximum performance for a wide range of applications.

Designed to thrive in tough environments, this series features all the benefits of an electric forklift combined with the strength and power you'd expect from internal combustion engines.

KEY ADVANTAGES:

- Lower cost of ownership On average, the overall life cycle operating costs for electric forklifts are one quarter of the cost of IC lift trucks*. What does this mean for your business? A greater cost savings over the long run without sacrificing power or performance.
- Longer run times Up to two shifts on one battery charge in most applications.
- Flexible use, indoors and out This series is designed for both indoor and outdoor use with the ability to lift up to 6,500 lbs.
 - * Based on a five-year life cycle.

- Low maintenance Sealed components provide added protection from dust, debris and moisture, resulting in a lift truck that's built to operate in even the most demanding applications.
- Zero fuel costs, zero emissions Electric lift trucks offer a cleaner working environment, and with no fuel costs, you'll see the savings add up - today and into the future.

THE ELECTRIC BENEFIT

See how an electric lift truck can save you more over the long run: www.cat-lift.com

CONFORT, FROM THE FIRST HOUR TO THE LAST

Smooth Handling, Greater Control

Built to tackle demanding applications both indoors and out, the 2EPC5000-2EP6500 series is equipped to keep your operators comfortable and in control, shift after shift.

TOTAL CONTROL

Your operators will enjoy this lift truck's high degree of control and its quiet, comfortable ride.

- Fingertip hydraulic controls integrated directly into the armrest, these controls deliver low-effort handling and precise control. For added convenience, the travel direction switch and horn are incorporated into the armrest for one-touch access during operation.
- One-touch / two-axis armrest allows upand-down and fore-and-aft adjustment plus the ability to adjust the surface angle to optimize comfort for operators and minimize fatigue.
- Storage compartment includes USB power port, useful for charging mobile devices, and is large enough to hold small tools, writing instruments, keys and other personal items.
- Advanced Curve Control technology automatically reduces travel speed when turning, providing added security for the operator and the load.
- Operator presence detection system automatically disengages the hydraulic controls and sets the parking brake when the operator is not in the proper operating position.

THREE TYPES OF PILOTS:

Depending on operator preference, each of these hydraulic controls is available to help maximize productivity.

Fingertip Control (Standard)

Joystick Control (Optional)

Mini-Lever Control (Optional)

To Get The Job Done

Cat lift trucks are designed to help you get the most out of your work day. From enhanced energy efficiency for greater uptime to premium performance levels, your operators will effectively move more per shift, every day.

SUPERIOR PERFORMANCE

Equipped with powerful 3-phase AC motors, the 2EPC5000-2EP6500 series boasts outstanding acceleration and impressive top speeds.

The truck's intelligent design and compact component layout also result in:

- Excellent performance on ramps and grades, providing a smooth transition from indoors to out
- Greater torque even at a lower speed, with no torque gaps and no speed loss
- Top travel speed over 10 mph can be adjusted to meet facility speed requirements

RELIABLE MOTORS

Closed electric motors allow these lift trucks to operate in environments that previously only IC trucks could handle.

- Fully-enclosed motor A motor with fewer parts means less maintenance needed. The motor's compact design and proximity to other components provides increased energy efficiency, helping you get more out of each shift.
- Ingress protected The truck's sealed systems provide better protection against dust, moisture and other debris to take on your toughest applications.
 - IP54-rated motors
 - IP56-rated connectors

POWER TO EXCEL - IN ALL APPLICATIONS

Featuring excellent performance levels, these lift trucks are built to excel in industries where IC lift trucks were once the only option.

- Optional enclosed cabin provides added durability and comfort when operating in wet, cold or extreme conditions
- Durable design and sealed components also provide added protection when working in severe temperatures or sensitive environments

OPTIONS TO INCREASE YOUR PRODUCTIVITY

Comfort (closed) cabin

Access authorization

Joystick unitized control

Enhance Your Operation

Additional options are also available to further customize the lift truck for your business.

Advanced ergo seat

Snap-Fit battery extraction

Mini-lever hydraulic control

Comfort (closed) cabin

Helps protect operators from adverse weather conditions. This cabin has additional options to further boost productivity in even the harshest environments.

Access authorization

Allows operator access via keypad with assigned user codes.

Advanced ergo seat

This five-way adjustable seat can improve operator comfort when driving over long distances.

Hydraulic accumulator

Provides additional cushioning when carrying heavy loads.

Dual solid pneumatic tires

Better distributes floor loading weight on unpaved surfaces when carrying a load.

Cold storage or **Tropics modification**

Equips the lift truck with special fluids and conditioning for optimal performance in cold or humid storage environments.

Travel speed reduction

Limits the top travel speed based on workplace preferences.

15° swivel seat

Light packages

Hydraulic accumulator

Electric heater

Cold storage / Tropics modification

Raised operator cab (for special applications)

INCREASE YOUR POTENTIAL WITH LITHIUM-ION

The lithium-ion battery package provides the highest performing battery solution -

- High performance batteries that are synchronized with the lift truck and charger for optimal energy efficiency
- No maintenance requirements and a longer service life mean each truck offers more daily use, increased throughput and reliable 24/7
- No more battery change-outs, watering, and degassing areas
- Maximize truck productivity through opportunity charging that can be interrupted anytime
- 5-year battery warranty included.

Genuine OEM parts

Custom financing packages

Factory warranty for added protection

Local Support You Can Count On

A Cat lift truck purchase connects you to a variety of material handling solutions, including world-class service and support from your local, trusted dealer. With factory-trained service technicians, a diverse parts inventory and a broad selection of service options, your local dealer can help you lower costs, enhance productivity and more efficiently manage your business.

FINANCING MADE SIMPLE

Financing your next Cat lift truck is easy with our wide range of flexible leasing and purchasing options. Whether you want to finance or lease, your local Cat lift truck dealer can help customize a package for your business.

WHEN EVERY PART COUNTS

When buying from your local Cat lift truck dealer, you can rest assured that your genuine OEM parts are manufactured to meet original equipment criteria. Additionally, all Cat lift truck OEM parts come with a six-month, unlimited-hours warranty.

When speed is critical, our Parts Fast Or Parts Free Guarantee* ensures next-business-day delivery of all Cat lift trucks parts, or they're free, including freight. If your part doesn't come in by the next business day, we pay for it.

STANDING BEHIND OUR PRODUCTS

We deliver peace of mind by helping your lift trucks stay on the job. Every new Cat lift truck is covered by a 1-year / 2,000-hours warranty that includes parts and labor, as well as components and systems. With our standard 2-year / 4,000-hours extended powertrain warranty, you'll have the confidence that only comes from owning a Cat lift truck.

^{*} At dealer's location

NOTE: Dimensions represent maximum battery size, not compartment size. These specifications assume the use of drive axles, tires and tilt angles specified. Any modification to specifications, or any other combination of specifications made after the shipment of the truck, requires prior written approval from Mitsubishi Caterpillar Forklift America Inc. (MCFA). (See ANSI/ITSDF B56.1.) Also be advised that overall operating visibility may be affected by the mast configuration and mast options of your forklift truck. Therefore, you may need to add ancillary [auxiliary] devices or modify your operating practices. Consult your dealer for further information.

Call-out numbers shown in diagram correspond to the first column of the specifications chart.

Safety Standards

These trucks meet American National Standards Institute/ Industrial Truck Standards Development Foundation, ANSI/ITSDF B56.1. Users should be aware of, and adhere to, applicable codes and regulations regarding operator training, use, operation and maintenance of powered industrial trucks, including:

- ANSI/ITSDF B56.1.
- NFPA 505, fire safety standard for powered industrial trucks type designations, areas of use, maintenance, and operation.
- Occupational Safety and Health Administration (OSHA) regulations that may apply.
