### PRECISE HANDLING IN A COMPACT DESIGN.

# PWT15-PWT18

3000-3,500 LB CAPACITY HEAVY-DUTY WALKIE STACKER

#### 1. Flexible

#### **Ergonomic Handling**

The long, low-mounted control handle provides a secure working distance between the operator and forklift. The handle is also easy to maneuver, allowing operators to easily position the forklift.

#### **Operator Control**

Providing added control, the crawl speed function allows the operator to pinwheel in tight spaces. The handle can also be used in the fully upright position for increased productivity when turning in tight spaces.

#### 2. Smart

#### **Peace Of Mind**

The "smart" directional reverse switch is designed to only be activated when traveling in the tractor-first direction, providing added protection for the operator and your application.

#### Easy-To-Use

An optional keyless entry pad limits access to authorized personnel. The keypad also provides pre-programmed performance levels designed to meet the experience level of various operators.

#### 3. Powerful

#### **Increased Productivity**

This forklift offers precise control when traveling at any speed. The AC-powered drive motor is brushless and the 3-phase AC controller allows for easy programming for various applications.

#### **Proportional Lift/Lower**

With full lift and lower control, the operator has the ability to be more precise in retrieving or putting away loads in the rack – resulting in less damage to product and surroundings.

MITSUBISH

#### 4. Reliable

#### Electric Power Steering

Electric power steering provides improved energy efficiency, operator comfort and serviceability over traditional hydrostatic power steering.

#### Valuable Support

Mitsubishi forklift trucks are supported by some of the industry's best services, such as flexible financing, 500-hour service intervals and extended warranties.

## PWT15-PWT18

2,600-3,500 LB CAPACITY HEAVY-DUTY WALKIE STACKER

#### Lithium-Ion Package

Lithium-ion batteries feature a lower cost of ownership than lead-acid batteries due to eliminating excessive maintenance costs. They can be charged to full capacity in a fraction of the time it takes to charge a lead-acid battery. Opportunity charging that can be interrupted at any time, prevents downtimes and ensures 24/7 truck usage. And this battery, vehicle, and charger are all synchronized with each other allowing for fast and efficient energy usage.

Manufactured with superior quality and exceptional value, Mitsubishi forklift trucks are supported by an extensive dealer and field support network located throughout North and South America. Don't forget to ask your local Mitsubishi forklift truck dealer about details on factory retail programs, financing plans and additional options and dealer services like planned maintenance and operator training.
