

Electric powered pallet truck with stand-on platform (5,500 lbs.) and fully enclosed integrated charger

Innovative operator compartment with four platform options to enhance productivity

Powerful 3-phase AC drive motor for optimum performance

shockPROTECT: spring-loaded drive unit cushions the operator, truck and load

positionCONTROL (optional): automated function that raises and lowers pallets to predefined heights at the touch of a button

## ERE 125 / 225 / 225DP

### Electric powered pallet truck (5,500 lb.)

The ERE powered pallet truck combines the maneuverability and comfort of a stand-on forklift in the compact design of a walkie end rider. A great tool for loading and unloading trailers, order picking inside the aisle or transporting 5,500-pound loads across your warehouse, the ERE 125 / 225 / 225DP can be individually adapted and customized to your specific application with the goal of moving goods faster and more efficiently.

One of the ERE pallet truck's unique features is the optional positionCONTROL, an automated function to help increase productivity. With the touch of a button,

the forks on the powered pallet truck rise to a preset height, thereby optimizing lift time and minimizing adjustments while moving more efficiently. Choose from three different settings for various pallet types.

This pallet truck is also ergonomically designed to make the operator comfortable and secure. With four different stand-on platforms and adjustable controls and cushions, users can set the height of the platform and the level of comfort to suit their specific requirements.

Comfort also comes in the form of the pallet truck's platform suspension. The drive unit includes a spring-loaded design with shockPROTECT to reduce vibrations in the operator compartment during use. For fixed platforms, additional comfort and shock reduction are available with the optional cushioned stand-on platform with weight setting adjustments. Additionally, the drivePLUS version with its 3.2 kW drive motor ensures quick acceleration and drive speeds up to 8.69 mph.

# ERE 125 / 225

# The Jungheinrich Advantage

With four different stand-on platforms, users can also set the height of the platform and the level of comfort to suit their specific requirements.

The platform with side entry is suitable for order picking as well as loading and unloading trailers.

## Ergonomic operator compartment

The ERE features an ergonomic operator compartment that helps minimize operator fatigue over the entire shift.

- The drive unit and operator platform (optional) provide cushioning. Advantages include:
  - Reduced strain on the operator's back
  - Less stress on the chassis and components
- Spring-loaded and cushioned support wheels, connected via the ProTracLink system, help provide stable handling in a wide variety of applications.
- Plenty of storage space for paperwork and supplies.
- Truck speed during turns is automatically reduced with curveCONTROL to help stabilize loads, depending on the steering angle.
- When traveling with the forks trailing, the operator can maintain a side-stance position and hold themselves steady with one hand on the tiller and the other on the fixed platform handle.
- With fixed platforms (optional), an electronic photo eye protection beam (also optional) detects when the operator's foot moves outside the vehicle compartment, significantly slowing travel speed.

## 4 Available Stand-On Platforms

- **Foldable platform with restraint system**
  - for application use in pedestrian mode
- **Fixed compact platform**
  - Short platform, firm side walls
- **Fixed elongated platform**
  - ergonomically designed for enhanced productivity and comfort
- **Order picking platform with side entry**
  - suited for order picking, loading and unloading of trailers; accommodates both left- and right-handed operators

## A variety of options are available to meet the specific needs of your applications, including:

- 2-inch color display with battery discharge indication, event message displays, speed display and three preset operator driving modes.
- Activation of maximum travel speed only when forks are at a properly raised height provides a reliable reduction in wear under the forks.
- A newly developed, height-adjustable smartPILOT electric tiller head features color-coded buttons with abrasion-resistant symbols for intuitive or tactile operation.

## Powerful 3-phase AC drive motor and "intelligent" electronic controller

Progressive drive technology and control electronics (speedCONTROL) provide productive and energy-efficient operation with adjustments to fit most applications:

- The speed set by the accelerator is maintained in every travel situation – even during climbing and descending gradients and slopes.
- The ERE is protected against unintended rollback on ramps by automatic brake activation.
- Energy is returned to the battery during speed reduction using regenerative braking.

## Lithium-ion Package Advantages

- Fast charging with no need for battery exchanges
- Maintenance-free with no odors from gases or acidification
- Longer service life and lower maintenance compared with lead-acid batteries
- Charging can be interrupted at anytime
- 5-year battery warranty included

## Parts when you need them

Jungheinrich's Parts Fast or Parts Free Guarantee ensures next-business-day delivery by 5:00 PM of all Jungheinrich parts in the United States, or they're free, including freight. For customers in Canada and Mexico, the guarantee ensures shipping of parts within 24 hours from the time the order was placed by the dealer. See your local Jungheinrich dealer for program details.

\* Programs may be subject to change without notice and may vary by region. Please ask your local Jungheinrich dealer for complete terms and conditions.
